DETAILED ACTION

Allowable Subject Matter

1. Claims 1-15 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The primary reason for the allowance of claims 1-12 is the inclusion of the limitation of a portion of the metal plate is overlapped on the printed circuit board, the rest portion of the metal plate is separated from the printed circuit board. It is this limitation found in each of the claims, as it is claimed in the combination, that has not been found, taught or suggested by the prior art of record which makes these claims allowable over the prior art.

The primary reason for the allowance of claims 13-15 is the inclusion of the limitation of a second region extending from an edge of the printed circuit board in cantilever type, the edge being essentially located right beside the grounding element; wherein the second region is offset from the printed circuit board in the vertical direction. It is this limitation found in each of the claims, as it is claimed in the combination, that has not been found, taught or suggested by the prior art of record which makes these claims allowable over the prior art.

Umehara et al. (U.S. Patent No. 6,774,849) teaches the inverted-F antenna is mounted on a printed circuit board having a ground pattern over its top surface. Here, the ground pattern is so shaped as to avoid an area in which the inverted-F antenna is mounted. However, Umehara et al. does not disclose or suggest a portion of the metal

plate (i.e. ground pattern) is overlapped on the printed circuit board, the rest portion of the metal plate is separated from the printed circuit board.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
